

# PC 12C BATTUE PRO

## Change your point of view

The BATTUE target, invented by Jean-Michel Laporte, offers a dazzling start for about 40m before slowing down and turn. Designed to be fired from below, the Battue is most often launched from a tower or hill. Our launcher is robust with low-maintenance, low-consumption and high capacity to reduce the need for dangerous interventions. Clays can also be thrown upside down.
