

RABBIT LOOPER 8C

Follow the Rabbit

The Rabbit clay was also invented by Jean-Michel Laporte. The movement of this plate thrown on its edge, bouncing, rolling on earth, wood and sometimes even on some cleverly placed puddles is one of the most appreciated attractions for shooters. Our launchers have been designed to throw them efficiently while preserving their integrity until the pellets hit.

Rabbit

Capacity (Clays)	up to 480
Targets (Diam)	Autorabbit
Tilting (R/L)	n/a
Angle backward	0° up to 45°
Recocking time	2.2sec
Voltage (V)	12V
Weight (Kg)	75Kg
Ref	1000727
