

# Running Boar

## The reference used for the official Hunting licence

This discipline proposed by the LAPORTE group allows hunters to practice shooting with bullets all year round. It only takes an hour and a half to install. The parts making up the rail allow it to adapt to uneven terrain, giving the boar's trajectory a very natural appearance. The modular rail system supplied with the Current Boar allows trajectories of 20 to 50 metres to be adapted. Available as a Swivel or Rocker Boar.

Running Boar	
Rail	25 m
Targets	3 "long life" targets included
Remote	50 meters wired remote control with speed variation
Options	Radio Remote / 40m rail
Ref	1307579

Cotation en mm
